

# ISO STANDARDS CONSULTING & IMPLEMENTATION

Transform Compliance into a Competitive Advantage.

At Shilpa Advisors, we don't just help you pass audits — we help you build systems that earn global credibility and customer trust.

*Sri Lanka | Asia | Global Reach*

# Overview

---

Shilpa Advisors specializes in helping organizations achieve ISO certifications across diverse standards — ISO 9001 (Quality), ISO 14001 (Environment), ISO 45001 (Occupational Health & Safety), and more.

We combine deep audit expertise with practical business understanding to make compliance a growth enabler, not a burden.

# The Challenge

---

Many organizations treat certification as a one-time task.  
We see it differently — it's an opportunity to standardize, improve, and scale operations sustainably.

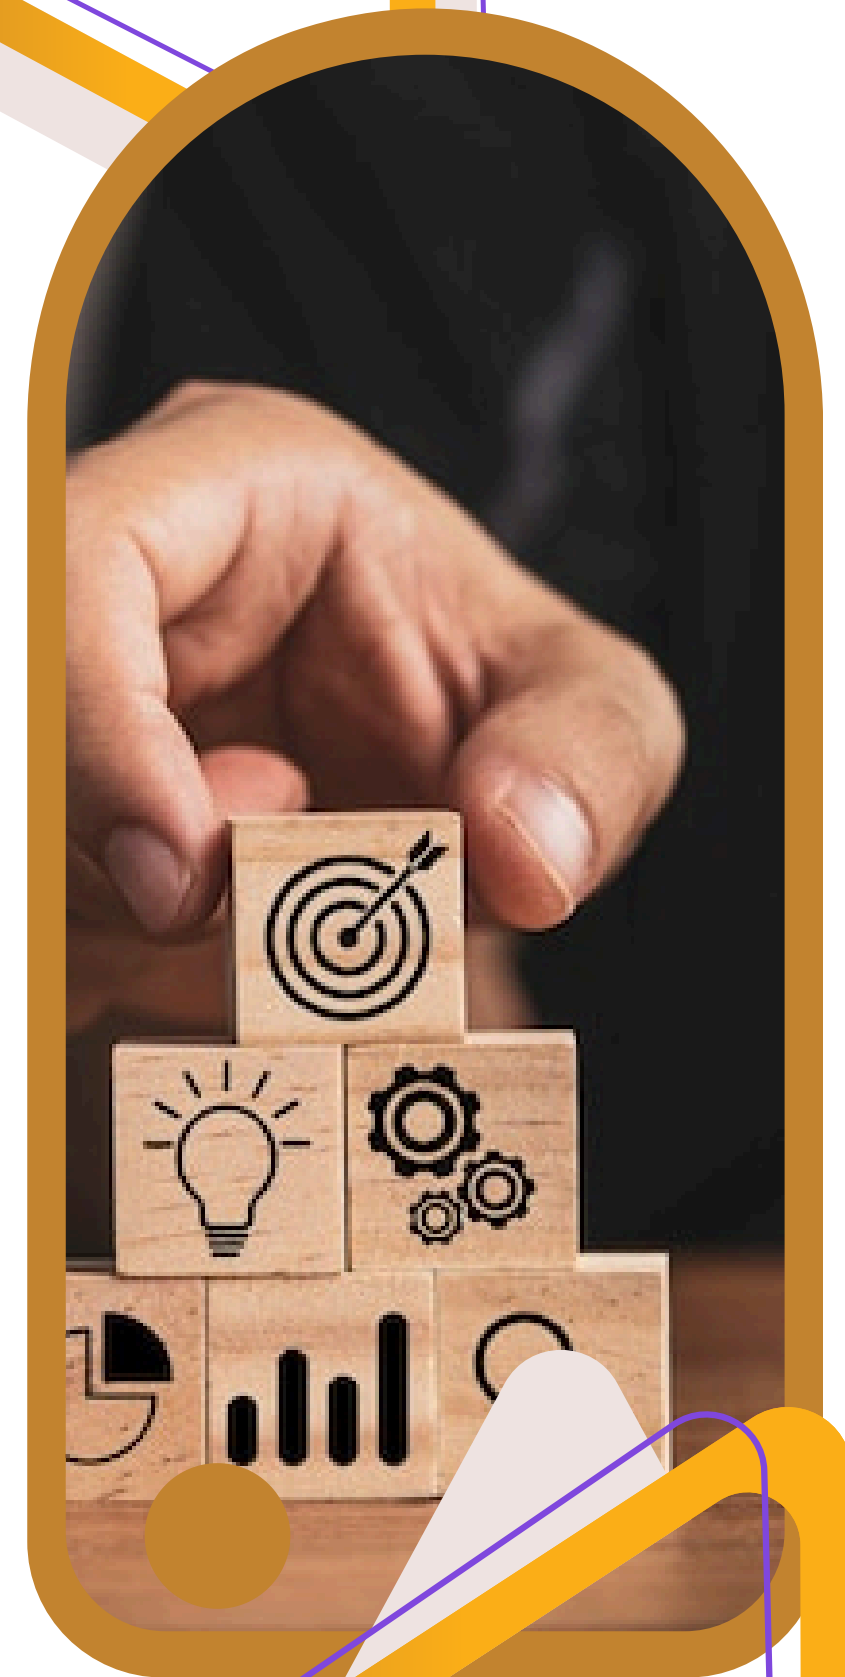

Common issues we solve:

- Documentation gaps & audit non-conformities
- Unclear quality policies & objectives
- Poor internal communication between departments
- Lack of internal audit competence

# Our Approach

## A 6-Step Framework for ISO Success:

- **Gap Analysis** – Identify current performance vs. ISO requirements
- **System Design** – Develop policies, procedures & manuals
- **Risk & Opportunity Planning** – Build resilience into operations
- **Training & Internal Audits** – Empower your internal team
- **External Audit Preparation** – Coordinate and support certification
- **Continuous Improvement** – Sustain performance year after year

# Deliverables

- Complete documentation toolkit (manuals, policies, forms)
- Audit readiness report
- Internal auditor training certificate
- Post-audit improvement plan

# Results

---

- Certification achieved faster
- Reduced operational risk
- Improved stakeholder confidence
- Proven system for long-term compliance

# LET'S MAKE COMPLIANCE YOUR COMPETITIVE EDGE.
